

Earth Day at Union Slough!

Celebrate Earth Day by helping to restore habitat at Union Slough, a unique saltmarsh site in the lower Snohomish River estuary!

The Union Slough Saltmarsh Restoration site, owned by the Port of Everett, was constructed in February 2001 and expanded in October 2005 by removing two dikes and excavating a channel system, allowing tidal waters to flood the site. These actions converted 24 acres of former agricultural land to conditions representative of the original habitat in the estuary that benefit salmon, crab, waterfowl and shorebirds.

Come and help our native plants survive their early years by spreading mulch to the native plants installed at the site getting them ready for the dry summer months, weeding blackberry in priority areas to get them ready for next fall's planting season and picking up trash and debris around the site.

People For Puget Sound will provide volunteers with tools, water and snacks. Volunteers are asked to bring a sack lunch, refillable water bottle, and enthusiasm for ripping out invasive weeds

Join People For Puget Sound and volunteers like you, who are committed to re-establishing a native plant community in Union Slough Saltmarsh Restoration Site! To register for the event please contact Gail Lassman at register@pugetsound.org
