

LEHIGH™

HEIDELBERGCEMENT Group

Lehigh Everett Cement Distribution Facility

Air and Noise Fact Sheet

- ◆ The cement handling system will be designed for dust containment during unloading, conveying, storage or transport.
- ◆ All conveyor and transfer equipment will be maintained to high standards.
- ◆ Lehigh will be using loading spouts with integral air venting and filtering to load material
- ◆ The loading facilities (truck or rail) will be enclosed.
- ◆ All site dust collection systems will be reviewed and replaced as needed, using current technology. The dust collection at the top of the dome will be removed and replaced with dust collection at ground level for added effectiveness.
- ◆ Lehigh will retain a noise monitoring expert to measure noise after operations have begun to ensure compliance with local noise codes.
